## Introduces

### EEOOS Magnetic View, Crane Hook Viewing System

Designed in cooperation with crane operators, this system allows the operator to see what is beneath his hook. Built to be rugged, and to withstand impact and weather exposure typical on construction sites, this system installs directly to the rope block. Each component has a powerful magnetic mount and the camera and transmitter are powered by a 12V battery included in the system.

The kit includes:

- CLR01 ruggedized color video camera and magnetic mount
- Hardened Wireless Transmitter with magnetic base (HTM)
- 12V Battery pack with magnetic base --over 12 hours of operation
- Wireless receiver
- Battery charger
- LCD 7" TFT monitor
- All necessary cables
- Safety cables
- 24V to 12V DC/DC power converter (if required)
- Carrying case
